

# Pallet Truck

# GP-HP

## GP-HP

The GP-HP is a simple and robust pallet handling truck that comes in three different lifting and moving capacity, 2.0 Ton, 2.5 Ton and 3.0 Ton.

This small and rugged device makes it possible to move loads without the use of forklifts or any other heavy equipment, depending on man power, and move loads easily and smoothly by simply sliding the forks into the open area of the pallet, engage the load through lifting the forks gently and simply slide it across the way.

The truck is one-piece chassis with welded and formed steel plate design, protects it from impact damage and extends forklift's lift span.

The compact design of each components ensures a convenient access to lubrication points for a quick and easy maintenance.

The pallet truck with galvanization of hydraulic pump to avoid rust and extend its service life, it is a maintenance free fully integrated type which can avoids contamination and oil leaking.

The overload protection prevents the truck from application under overloaded condition, which can highly reduce its maintenance cost.

## Technical Specifications

Model			GP-HP20	GP-HP25	GP-HP30
1	Rated Capacity	kg	2000	2500	3000
2	Power		Manual	Manual	Manual
3	Fork Width	mm	550/685	550/685	550/685
4	Fork Length	mm	1150/1220	1150/1220	1150/1220
5	Min. Fork Height	mm	75	85	85
6	Max. Fork Height	mm	190	200	200
7	Front wheel	mm	Φ70*60	Φ80*70	Φ80*70
8	Steering Wheel	mm	Φ160*50	Φ180*50	Φ180*50
